

Belize cable tray mesh price

Overview

belize-mesh-cable-tray-prices Manufacturer/Producer Since 1982, VALDINOX has been designing and manufacturing wire mesh cable trays, supports, and easy-inst.

Key Takeaways

Mesh cable trays in Belize are available from local manufacturers, with prices influenced by material type, size, and customization, typically making wire mesh trays the most cost-effective option. Overview of Mesh Cable Trays in Belize

Mesh or wire basket cable trays are widely used in data centers, offices, and industrial installations due to their lightweight design, ease of installation, and excellent ventilation for cables. In Belize, several manufacturers and suppliers provide these trays, including Jeetmull Jaichandlall (P) Ltd., Cable House, and Brilltech Engineers Pvt. Ltd., offering a range of sizes, shapes, and materials. These trays are typically made from steel wire welded into a basket structure, which allows for easy cutting and bending to fit specific layouts.

Factors Affecting Price

- Material Type:
 - Pre-Galvanized Steel (PG): Most affordable, suitable for dry indoor areas like offices or schools.
 - Hot-Dip Galvanized Steel (HDG): More expensive, ideal for outdoor or industrial environments due to superior corrosion resistance.
 - Aluminum: Lightweight and corrosion-resistant, but higher initial cost; may reduce installation costs due to lighter hangers.

- **Size and Configuration:** Larger trays or custom shapes increase material usage and processing time, affecting the price .
- **Customization and Finishing:** Trays tailored to specific industrial or architectural requirements, including powder coating or special dimensions, can raise costs .
- **Installation Considerations:** Mesh trays are easier and faster to install than conduit systems, potentially saving 40–60% of total project costs when considering labor and time .

Price Range

While exact Belize-specific prices are not publicly listed, mesh cable trays are generally the most affordable type of cable tray, especially compared to ladder or solid-bottom trays . Bulk orders from local suppliers like Cable House or Brilltech Engineers can offer competitive pricing, and contacting them directly is recommended to obtain quotes based on material, size, and quantity .

Recommendations

- Request multiple quotes from local suppliers to compare prices and lead times.
- Specify material and finish based on indoor/outdoor use to avoid unnecessary costs.
- Consider total project cost, including installation, as mesh trays reduce labor compared to conduit systems . By evaluating these factors, businesses in Belize can select cost-effective mesh cable trays that meet both budget and operational requirements.
