

Fiber Optic Cable Double Suspension

Overview

The unique design of the lightweight AFL Mechanical Suspension supports spans of optical ground wire (OPGW) cable through a wide range of line angle changes.

Key Takeaways

The Double Rod Suspension Bracket 100mm is a durable mounting solution designed to secure fiber ducting channels to the ceiling using two threaded rods one on each side of the channel. SRR and outer rods cannot be reused. Hardware components can be reused. The unique design of the lightweight AFL Mechanical Suspension supports spans of optical ground wire (OPGW) cable through a wide range of line angle changes. AFL's Mechanical Suspension installs easily while supporting vertical, transverse, longitudinal unbalanced loads and angle pulls without. Helical Suspension Set is mainly used for hanging and supporting optical fiber cable on straight pole and tower, to transmit axial load and divert axial pressure which provide well protection for optical cable, to avoid emergencies happen such as too small bending radius or stress concentration. FIBERLIGN Figure 8 Drop Cable Dead-End offers high-strength in a lightweight package. Simple to install, the dead-end is applied on the messenger component of the Figure 8 cable after separating the fiber component at the web. Fixed Crossarm Systems are Crossarms that are bolted together with a. We manufacture a wide range of hardware fittings for OPGW Optical Ground Wire, including Suspension and Tension Assemblies, Down Lead clamps, Earthing Clamps, Splice Enclosure, Reinforcing Rods, Vibration Dampers, etc.
