

How much does a fireproof cable tray cost in Europe

Overview

As Emit Metal, we are one of the leading manufacturers of metal cable trays, ladders, and trunking systems in Turkey since 2004.

Key Takeaways

Fireproof cable trays in Europe typically range from €50 to €250 per meter, depending on material, fire rating, and supplier. Price Range and Factors

The cost of fireproof or fire-resistant cable trays varies widely based on several factors:

- **Material:** Hot-dip galvanized steel trays are common and moderately priced, aluminum trays are lighter but more expensive, and fiber-reinforced plastic (FRP) trays are used in corrosive environments and can be the most costly .
- **Fire Rating:** Trays certified for 60, 90, or 120 minutes of fire resistance (DIN, UL, BS, or IEC standards) command higher prices due to testing and certification requirements .
- **Design and Load Capacity:** Perforated trays, cable ladders, or basket-style trays differ in manufacturing complexity. Higher load ratings and larger dimensions increase cost .

- **Supplier and Certification:** Established European suppliers with verified fire performance reports may charge a premium, while generic or untested trays are cheaper but risk non-compliance .

Typical Market Estimates

- **Standard fireproof steel trays:** €50–€120 per meter
- **High-performance or LSZH (low smoke, halogen-free) trays:** €120–€200 per meter
- **Specialized FRP or corrosion-resistant trays:** €200–€250 per meter These prices generally exclude installation, accessories, and fireproofing components such as intumescent pads or cable cleats, which can add 10–30% to the total project cost .

Additional Considerations

- **Compliance:** Ensure trays meet local fire codes and European standards (DIN EN 61537, IEC, or national fire safety regulations), .
- **Project Scale:** Bulk orders for industrial or infrastructure projects may reduce per-meter costs.
- **Maintenance and Lifecycle:** Durable materials like galvanized steel or FRP offer longer service life, potentially offsetting higher upfront costs. In summary, while fireproof cable trays in Europe generally cost €50–€250 per meter, the final price depends on material, fire rating, supplier reliability, and project-specific requirements .
