

How much does a switch for a distribution box cost

Overview

Price ranges for switch sockets and related installation are driven by type, amperage, configuration, and labor.

Key Takeaways

Replacing a switch in a distribution box typically costs between \$120 and \$314, depending on labor, materials, and location. Typical Cost Range

For a standard switch replacement in a distribution box, the national average cost ranges from \$126 to \$314 per switch as of 2026, which includes both labor and materials for basic mid-range work performed by a professional electrician . If the switch is part of a circuit breaker panel, the cost can be slightly lower, around \$120–\$200, depending on the region and whether additional wiring repairs are needed . Labor rates for electricians generally range from \$40 to \$120 per hour, with more complex installations or rewiring increasing the total cost .

Factors Affecting Cost

- **Type of Switch:** Standard single-pole switches are cheaper, while specialized switches (e.g., smart switches or high-amperage breakers) cost more .
- **Panel Type and Location:** Indoor panels are generally less expensive to service than outdoor panels, and older or hard-to-access panels may require more labor .
- **Additional Work:** If rewiring, conduit adjustments, or structural modifications are needed, costs can rise significantly .

- **Regional Variations:** Labor rates and permit fees vary by location, with urban areas typically higher than rural areas .

Material Costs

The switch itself can range from \$10 to \$600, depending on brand, amperage, and features such as smart monitoring or energy efficiency . For most residential applications, a standard switch or breaker replacement will fall on the lower end of this range.

Summary

- Basic switch replacement: \$126-\$314 per switch (labor + materials)
- Circuit breaker switch replacement: \$120-\$200
- Factors influencing cost: switch type, panel location, additional wiring, labor rates, permits
- Material-only cost: \$10-\$600 depending on specifications For an accurate estimate, it is recommended to consult a licensed electrician who can assess your specific distribution box, switch type, and installation conditions.
