

Imported cover plate of distribution box

Overview

This distribution box cover is suitable for the installation of all kinds of switches, light switches, sockets, and other types of equipment.

Key Takeaways

Imported distribution box cover plates are available in metal or plastic, often IP65-IP67 rated, customizable, and suitable for residential or commercial electrical installations.

Imported distribution box covers, also known as distribution board cover plates, are designed to protect electrical circuits and components while providing easy access for maintenance. They are typically made from durable plastic or metal, with options for transparent or opaque finishes to allow visibility of switches and indicators without opening the cover. Many imported covers are CE-certified and meet international safety standards.

Key Features

- IP Ratings: Commonly IP65 to IP67, offering protection against dust and water ingress.
- Material Options: Plastic (lightweight, corrosion-resistant) or metal (robust, fire-resistant).
- Customization: OEM branding, logo embossing, modular layouts, busbar fitment, and top cable entry modifications are available for bulk or wholesale orders.

- **Circuit Compatibility:** Covers are available for single-row, double-row, or three-row distribution boxes, supporting multiple circuits (e.g., 36-circuit panels), .
- Sourcing and Pricing

Imported covers can be purchased from Alibaba, AliExpress, Made-in-China, and Taobao, offering both retail and wholesale options . Prices vary depending on material, size, IP rating, and customization, with bulk orders typically reducing per-unit costs . Delivery times depend on stock availability and whether the cover is customized; standard stock items may ship quickly, while OEM orders require longer lead times .

Applications

- **Residential:** Protects home electrical panels from dust and accidental contact.
- **Commercial/Industrial:** Ensures safety in offices, factories, and public buildings, often with higher IP ratings for harsh environments.
- **Maintenance-Friendly:** Transparent covers allow monitoring of switches and circuit breakers without opening the panel . For purchasing, it is recommended to compare suppliers, check IP ratings, and confirm compatibility with your distribution box model. Many suppliers also provide customized solutions to match specific electrical layouts or branding requirements .
