

Kuwait Fire-Resistant Cable Tray Production

Overview

Cable Tray System – Kuwaiti Al Nafe Group for General Trading. Alnafaa Group GRP cable ladders and GRP FRP cable trays are made on fully automated heavy.

Key Takeaways

Kuwait produces high-quality fire-resistant FRP/GRP cable trays through specialized manufacturers like Al Nafe Group and Ferrotech, offering corrosion-resistant, durable, and fully compliant systems for industrial and commercial projects. Key Manufacturers and Suppliers

Al Nafe Group is a leading producer of GRP/FRP cable trays in Kuwait. Their products are manufactured using glass-armoured thermoset fire-resistant resins, providing anti-corrosion, UV resistance, electrical insulation, and low thermal conductivity. They offer ladder and perforated cable trays along with a wide range of fittings such as bends, tees, crosses, reducers, and accessories like FRP coupler plates, expansion plates, hold-down clamps, and cover clamps. Their systems are designed for industrial, commercial, and chemical environments where metallic trays may corrode or conduct heat excessively. Ferrotech also supplies FRP cable tray systems in Kuwait, emphasizing fire retardant properties and durability. Their trays are available in perforated and ladder types, with complete accessory sets including adjustable splice plates, trefoil clamps, cable ties, and blind plates. These systems are suitable for projects requiring stringent fire safety and corrosion resistance. Al Tamimi provides FRP services and installation for industrial applications, including turnkey electrical and instrumentation projects. They specialize in FRP piping and cable management systems for oil, gas, and construction sectors, ensuring compliance with KOC/KNPC/KOTC standards. Bahman Group operates a large cable tray manufacturing facility in Shuwaikh Industrial Area, producing GI cable trays, ladders, and trunking for local projects, hospitals, and universities. While primarily focused on galvanized steel systems, they support large-scale infrastructure projects in Kuwait and the GCC. Almeer Industries provides cable tray solutions for commercial and industrial construction, focusing on flexible installation and future expansion, though specific fire-resistant FRP options are less emphasized.

Features of Fire-Resistant FRP/GRP Cable Trays

- Fire Retardant: Compliant with stringent fire safety standards.
- Corrosion Resistant: Ideal for chemical, coastal, or humid environments.
- Electrical Insulation: Reduces risk of short circuits and eliminates earthing requirements.
- UV and Weather Resistant: Suitable for outdoor installations.
- Lightweight and Easy to Install: Simplifies handling and reduces structural load.
- Comprehensive Accessories: Includes couplers, clamps, covers, and trefoil clamps for complete cable management.

Applications

These cable trays are widely used in oil and gas facilities, petrochemical plants, power stations, commercial buildings, hospitals, and infrastructure projects. They are particularly suitable where metallic trays may corrode, conduct heat, or require frequent maintenance. In summary, Kuwait has a well-established FRP/GRP cable tray production industry, with manufacturers offering fire-resistant, corrosion-proof, and versatile systems suitable for a wide range of industrial and commercial applications. Leading suppliers like Al Nafe Group and Ferrotech provide both products and installation services, ensuring compliance with local and international safety standards.
