

Nigeria ODMAOC Active Optical Cable SFP

Overview

AOCs offer advantages over traditional copper cables, including higher bandwidth, lower latency, and better signal quality.

Key Takeaways

Active Optical Cable (AOC) SFP modules in Nigeria are available for high-speed networking, supporting 10G to 25G data rates and compatible with Cisco, MikroTik, Ubiquiti, and other switches. Overview of AOC SFP

Active Optical Cables (AOCs) are plug-and-play fiber assemblies that integrate the transceiver and fiber into a single cable, eliminating the need for separate SFP transceivers. They are designed for short- to medium-range high-speed connections between switches, servers, and storage systems, offering low latency, energy efficiency, and simplified cabling. AOCs are ideal for switch-to-switch or switch-to-server connections in data centers and enterprise networks.

Specifications and Features

- Data Rates: Commonly available in 10G, 25G, 40G, 100G, and higher speeds .
- Cable Lengths: In Nigeria, 25GB ASE AOC SFP cables are offered in 5m, 7m, 10m, and 20m lengths .
- Fiber Type: Typically OM3 multimode fiber, suitable for high-speed short-range links .
- Compatibility: Works with major brands including Cisco, MikroTik, Ubiquiti, Juniper, Arista, Dell, Intel, Mellanox, and more .

- Plug-and-Play: No additional configuration is required; the cable is recognized automatically by compatible devices.

Availability in Nigeria

- Jumia Nigeria offers 25GB ASE Active Optical SFP cables for various lengths and brands, with cash-on-delivery options .
- Jiji.ng lists multiple SFP modules and networking products, including Cisco SFPs and other compatible transceivers .
- Local suppliers like Star Computer Limited in Abuja manufacture and distribute a wide range of fiber optic transceivers, including SFP, SFP+, XFP, and DWDM modules, with ISO9001 certification and warranty support .

Advantages of Using AOC SFP

- Simplified cabling: Combines transceiver and fiber in one assembly.
- Energy-efficient: Lower power consumption compared to separate transceivers.
- High performance: Supports high-speed data transfer with minimal latency.
- Reliable: Fixed-length, secure connections reduce signal loss and interference. For Nigerian buyers, AOC SFP cables are readily available online and through local distributors, making them a practical choice for upgrading or expanding high-speed network infrastructure.
