

Oman Hot-dip Galvanized Cable Tray Price Quote

Overview

Hot Dip Galvanized (GI) Perforated Cable Trays are metal trays coated with a layer of zinc through the hot-dip galvanizing process.

Key Takeaways

Hot-dip galvanized cable tray prices in Oman vary by size, finish, and quantity, and are typically provided via direct supplier quotes.

- **DANA Steel Processing Industries LLC** Offers a wide range of cable trays, ladders, and accessories in hot-dip galvanized finish, suitable for offshore, marine, infrastructure, and refinery projects. Tray widths range from 75 mm to 1500 mm, with side walls from 40 mm to 150 mm, and rung spacing from 30 mm to 75 mm. Products are exported across the GCC, including Oman, and are customized to client specifications (DANA Steel) .
- **Brilltech Engineers** A local supplier and exporter in Oman providing galvanized cable trays designed for quick installation. They offer free quotes upon request and cater to industrial and commercial projects (Brilltech Engineers) .
- **GERSAN ELEKTRIK LLC** Supplies perforated cable trays in hot-dip galvanized, pre-galvanized, and stainless steel finishes. They provide standard 3-meter lengths with couplers and all necessary fixing accessories. GERSAN also offers support systems like channels, brackets, and cantilevers for cable tray installation (GERSAN) .

- UMG Oman A local manufacturer of structural steel products, including hot-dip galvanized cable trays. UMG supplies products across Oman and the GCC, with customization options for industrial and infrastructure projects (UMG) .

Pricing Guidance

- Price Factors: The cost depends on tray width, height, thickness, finish, and quantity. Hot-dip galvanized trays are generally more expensive than pre-galvanized or epoxy-coated options due to corrosion resistance and durability.
- Requesting Quotes: Most suppliers in Oman provide pricing on request. Contacting suppliers directly ensures accurate quotes based on your project specifications. For example, Brilltech Engineers can be reached via phone to discuss requirements and obtain a free quote (Brilltech Engineers) .
- Bulk Orders: Larger orders or long-term supply contracts may qualify for discounts. Export packaging and palletization may also affect the final price (DANA Steel) .

Recommendation

To obtain the most accurate pricing for hot-dip galvanized cable trays in Oman:

- Prepare your project specifications: tray dimensions, load requirements, finish, and quantity.
- Contact multiple suppliers such as DANA Steel, Brilltech Engineers, GERSAN, and UMG to request detailed quotes.
- Compare delivery times, warranty, and installation support in addition to price to ensure the best value for your project. This approach ensures you receive competitive pricing tailored to your specific needs while considering quality and supplier reliability.
