

Price of 22dB Optical Amplifier

Overview

This kind of optical amplifier is designed for the application of single channel or 1~8 continuous ribbon channels (ITU wavelength).

Key Takeaways

22dB optical amplifiers (EDFA) typically range from approximately \$400 to \$1,200 depending on features, output power, and vendor. Overview of 22dB Optical Amplifiers

A 22dB optical amplifier is commonly an Erbium-Doped Fiber Amplifier (EDFA) designed to boost optical signals in fiber networks, particularly for CATV, FTTH, and long-distance telecom applications. These amplifiers operate around 1550nm wavelength, with output power typically around +22 dBm, and are packaged in 1RU rack-mount units for easy integration. They often include features like low noise figures (
