

Price of Standard Cable Trays

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Standard cable trays typically range from \$15 to \$76 per unit depending on type, material, and purchase volume.

Standard cable trays, commonly used for supporting electrical cables in buildings, are often hot-dip galvanized ladder type trays with a standard length of 2.4 meters . Prices vary based on material, finish, and whether the purchase is for consumer (B2C) or industrial/commercial (B2B) use.

- B2C (Retail/Consumer): Cable trays for home or small office use are priced between \$15 and \$34 per unit, with smaller under-desk or wire management trays available for as low as \$0.92 wholesale .

- B2B (Industrial/Construction): Bulk purchases for construction projects, data centers, or manufacturing facilities range from \$0.80 to over \$76 per unit, depending on size, material, and coating .

Material and Finish Considerations

- Hot-dip galvanized steel: Common for medium and heavy-duty applications, offering corrosion resistance for both indoor and outdoor use .

- Pre-galvanized steel: Suitable for light to medium-duty applications, often more cost-effective .

- Stainless steel (SS 304): Used in environments requiring high corrosion resistance, typically at a higher price point .

Accessories and Fittings

Cable tray systems often require additional components such as couplers, bends, tees, crossovers, and lids, which are priced per piece. For example, medium-duty couplers sold in pairs are designed to join two tray lengths and are included in the overall system cost .

Summary

The price of a standard cable tray depends on length, material, finish, and purchase volume. For a typical 2.4-meter hot-dip galvanized ladder tray, expect \$15-\$76 per unit, with lower prices for bulk industrial orders and higher prices for premium materials or specialized applications . For accurate budgeting, it is recommended to consider both the tray and necessary fittings, as well as delivery costs if purchasing from suppliers like RS Components, CMW, or Direct Channel .
