

Price of horizontal stripping of optical cable

Overview

Horizontal Cutting Fiber Optic Cable Stripper Easy Use Stripping Tool. [Versatile Use] Suitable for stripping the outer sheath of 2mm and 3mm indoor fibre.

Key Takeaways

Horizontal fiber optic cable strippers typically range from \$10 to \$150 depending on type, brand, and functionality. Hand-Held Horizontal Strippers

Basic hand-held fiber optic strippers designed for horizontal cutting of indoor cables (2-3 mm) are widely available on e-commerce platforms. These tools often feature adjustable blade depth to prevent fiber damage and may include both horizontal and longitudinal cutting options. Prices for these tools generally range from \$10 to \$30 per unit on Amazon and eBay, depending on brand and shipping options .

Multi-Functional Fiber Cable Slitters

For more advanced applications, such as stripping armored or multi-core cables, fiber cable slitters provide precise horizontal and longitudinal cuts. These tools are designed for professional use in FTTx installations, data centers, and field maintenance. They often feature hardened steel or tungsten carbide blades, micrometric depth adjustment, and ergonomic handles. Prices for these precision tools typically range from \$50 to \$150, depending on the model, cutting capacity, and material quality .

Factors Affecting Price

- Cable compatibility: Tools for larger or armored cables are more expensive.
- Blade material: Tungsten carbide or high-carbon steel blades increase durability and cost.
- Adjustability: Tools with micrometric depth control or multi-blade configurations are priced higher.
- Brand and origin: Imported tools from China or specialized brands may include shipping and customs duties, which are additional costs .

Summary

- Basic horizontal strippers: \$10-\$30
- Professional fiber cable slitters: \$50-\$150
- Additional costs: Shipping, taxes, and import duties may apply depending on your location . These tools are essential for safe and efficient fiber optic cable preparation, ensuring clean cuts without damaging the internal fibers.
