

Price of partition screen for household electrical distribution box

Overview

Sorry, we're unable to complete your request We cannot complete your request due to a technical difficulty.

Key Takeaways

Partition screens for household electrical boxes typically range from \$10 to \$50 for steel dividers, while decorative panel covers can cost \$30-\$100 depending on size and style. Steel and Functional Partitions

For practical separation of circuits inside a distribution box, RACO galvanized steel partitions are commonly used. These are designed for 2-1/2" or 3-1/2" deep masonry electrical boxes and help separate low-voltage from high-voltage devices. Prices for these steel partitions generally start around \$10-\$20 per unit depending on depth and retailer . They are durable, pre-galvanized, and suitable for standard household electrical boxes.

Decorative or Wall-Mounted Covers

If the goal is aesthetic enhancement or a swing-door style cover, products like the Walnut Surface Wall Mounted Electrical Panel Cover on Amazon are available. These covers not only hide the panel but can also function as a small storage or display area. Prices for these decorative covers range from \$30 to \$100, depending on the outer frame size (e.g., 40x50cm to 60x70cm) and style . They are suitable for living rooms, kitchens, or offices where appearance matters.

Factors Affecting Price

- **Material:** Steel partitions are cheaper; decorative wood or composite covers cost more.
- **Size:** Larger panels or covers for bigger distribution boxes increase the price.
- **Functionality:** Swing doors, storage features, or custom finishes add to cost.
- **Retailer and Brand:** Prices vary between Amazon, Menards, and local hardware stores.

Budget Considerations

For a standard household electrical box, a functional steel partition is the most cost-effective solution at around \$10-\$20. If you prefer a decorative cover that blends with home interiors, expect to spend \$30-\$100. Full panel replacement or upgrades, including labor, can cost significantly more (\$1,200-\$2,500 for a 100-125A indoor panel), but this is separate from the partition screen itself .
