

Price of secondary distribution box panel

Overview

Amazon.com: 2 Breaker Sub Panel Check each product page for other buying options. Price and other details may vary based on product size and color. Sub Pane.

Key Takeaways

The price of a secondary distribution box panel typically ranges from USD 1,200 to USD 6,000 depending on amperage, installation type, and features. Typical Cost Ranges

- Residential indoor panels (100–125A): Approximately \$1,200–\$2,500, including parts and labor .
- Outdoor panels or higher amperage (200A): Can reach \$3,000–\$6,000, especially if a new meter socket or full upgrade is required .
- Commercial or industrial panels: Prices vary widely depending on capacity, three-phase systems, and advanced features like smart monitoring, remote control, or digital displays .

Factors Affecting Price

- Amperage and capacity: Higher-rated panels (e.g., 400–630A) cost more due to larger bus bars and protective devices .
- Indoor vs outdoor installation: Outdoor-rated enclosures with weatherproofing (IP55 or higher) are more expensive .
- Number of circuits: More circuits require additional breakers and bus bars, increasing cost .

- **Brand and quality:** Panels from Schneider Electric, Siemens, ABB, or Eaton are generally higher-priced but offer reliability and certifications .
- **Installation complexity:** Long wiring runs, structural modifications, or rerouting can add to labor costs .
- **Additional features:** Smart monitoring, energy management, or automation capabilities increase upfront costs but improve efficiency and safety .

Example Products

- **JXF series low-voltage distribution boards:** Suitable for three-phase systems up to 630A, with IP55 protection, used in hotels, industrial facilities, and residential buildings .
- **Standard residential FDBs:** Equipped with miniature circuit breakers (MCBs) for localized protection, typically single-phase or three-phase, depending on the building requirements . In summary, a secondary distribution box panel can cost anywhere from \$1,200 for a basic residential unit to \$6,000 or more for high-capacity, outdoor, or industrial-grade panels, with the final price influenced by amperage, installation type, brand, and additional features.
