

Price of two-core indoor optical fiber cable

Overview

Our 2 Core FTTH Single Mode Optical Fiber Cables are designed to meet the specific needs of telecom operators and ISPs.

Key Takeaways

The price for a 2-core indoor optical fiber cable typically ranges from \$0.30 to \$1.50 per meter, depending on fiber type and construction. Pricing Overview

For basic indoor applications, such as connecting devices within a building or setting up a small LAN, a 2-core multimode fiber cable can cost as low as \$0.30 per meter, while single-mode indoor cables designed for longer distances or higher performance may range from \$0.50 to \$1.20 per meter . Prices increase if the cable includes additional protective layers, LSZH jackets, or is rated for plenum spaces.

Factors Affecting Cost

- **Fiber Type:** Single-mode fibers are more expensive due to their ability to transmit over longer distances with minimal signal loss, whereas multimode fibers are cheaper and suitable for shorter runs .
- **Cable Construction:** Indoor-rated cables (PVC or LSZH jackets) are less expensive than plenum-rated or armored cables. Armored or industrial-grade cables can increase the price by 20-50% .

- Bulk Purchasing: Ordering larger quantities (e.g., 1,000 meters or more) can reduce the effective cost per meter by 20–30%, making it more economical for larger deployments .

- Connectors and Accessories: Termination, patch panels, and connectors add to the total cost if included in the installation.

Example Price Estimates

- Basic indoor multimode 2-core cable: \$0.30–\$0.50 per meter
- Indoor single-mode 2-core cable: \$0.50–\$1.20 per meter
- Premium indoor cable with LSZH jacket or additional protection: \$1.20–\$1.50 per meter For a small-scale indoor installation, a 100-meter run of 2-core multimode fiber could cost approximately \$30–\$50, while a single-mode version may cost \$50–\$120, excluding connectors and labor.

Recommendation

When requesting a quote, specify:

- Fiber type (single-mode or multimode)
- Indoor rating (PVC, LSZH, or plenum)
- Length required
- Any additional protective features This ensures the supplier provides an accurate price tailored to your installation needs.
