

Sliding-cover fiber optic terminal box

Overview

Splice boxes, also known as fiber optic splice enclosures or fiber splice closures, are essential components in fiber optic networks.

Key Takeaways

This 2-core optical termination box features a sliding cover design, providing high protection for fiber connection joints to minimize the risk of damage. Typically installed at end-user points like desktops, rooms, and homes, it accommodates 2 SC / LC adapters and supports both mounted and. Splice boxes and splice distributors are essential for a reliable fiber optic cabling system and serve as a connecting point between the fiber optic installation cable and the in-house network. High quality components ensure a secure and stable operation. The cable is fed to the wall outlet from the side. The body is fixed to the wall with. Robust and easy to deploy, our termination solutions for indoor and outdoor applications are ideal for single dwelling unit (SDU) and multi-dwelling unit (MDU) configurations. The FTB product family offers modularity and ease of installation supporting multiple application options, significantly. CommScope offers a complete line of easy-to-use access terminals, copper and fiber splice closures, patch closures and accessories to speed deployment. In every fiber build, there's a quiet place where the glass path meets the real world: the fiber optic terminal box.
