

Taiwan Low-Voltage Electrical Complete Equipment

Overview

We offer you the complete scope of low, medium and high voltage testing for power transmission & distribution equipment.

Key Takeaways

Taiwan offers a robust market for low-voltage complete electrical equipment, with manufacturers and system integrators providing turnkey solutions for industrial, commercial, and smart building applications. Key Manufacturers and Service Providers

1. First General Technology (FGT) FGT is a System Integration (SI) Low-Voltage Electrical Service Provider specializing in industrial control and smart building solutions. They provide turnkey services including hardware manufacturing (flow meters, controllers), software system design (SCADA, central monitoring), smart home solutions, access control, parking management, and fire signal integration. FGT also offers consultancy for construction companies and interior designers to plan complex low-voltage systems for large-scale projects . 2. TECO Corporation TECO provides comprehensive low-voltage solutions for industrial control, energy management, and smart infrastructure. Their offerings include EV charging systems, modular power distribution, HVAC, water supply, fire protection, and automation systems. TECO integrates drive systems, control, and smart energy management to optimize efficiency and energy use, supporting both commercial and residential applications . 3. Chuanli Electric With over 27 years of experience, Chuanli Electric manufactures low and high-voltage equipment and offers customized power solutions. Their products are suitable for industrial, commercial, and public facility applications, providing reliable and safe electrical distribution systems . 4. Entek Electric Entek Electric is a leading Taiwanese company specializing in low-voltage circuit breakers and related equipment. They provide complete manufacturing capabilities and design experience, ensuring high-quality low-voltage electrical components for industrial and commercial use . 5. TECO Energy Products Business Unit TECO's Energy Product Division produces magnetic switches, molded case circuit breakers, medium and low-voltage switchboards, and power distribution equipment. Their products comply with CNS, IEC, NEMA, and VDE standards and hold CSA, UL, and TUV certifications, ensuring safety and reliability. They provide full pre-sales and after-sales services, including system planning, design, production, construction, and maintenance .

Market Overview

Taiwan's low-voltage electrical market is characterized by integrated solutions combining hardware and software, catering to industrial automation, smart buildings, and public infrastructure. Companies often provide turnkey services, from system design to installation and maintenance, ensuring seamless integration of power distribution, monitoring, and control systems. Many manufacturers also collaborate with global brands like ABB, Schneider, and Siemens to enhance product quality and system compatibility .

Applications

- Industrial Automation: Power monitoring, process control, and instrumentation.
- Smart Buildings: Access control, surveillance, fire alarm integration, and energy management.
- Public Infrastructure: Large-scale electrical distribution, industrial parks, and municipal projects.

- Renewable Energy & EV Solutions: Substation management, EV charging, and energy-efficient power systems. Taiwan's low-voltage electrical equipment providers offer comprehensive, certified, and customizable solutions, making the country a reliable source for both domestic and international projects.
