

Validity period of relay protection electrician s certificate

Overview

The certificate is valid for 6 years. According to relevant regulations, starting from June 1, 2026, the Electrician Certificate will have a 6-year validity period with no required re-examination during that period. This certification requires completion of the following two courses, which may be completed in any order within an 18-month period: National Electrical Code 2020, 4 days, 2.8 CEUs, which you can take In-Person or Virtual, Live. This handbook covers the code of practice in protection circuitry including standard lead and device numbers, mode of connections at terminal strips, colour codes in multicore cables, dos and don'ts in execution. It is issued with a unified format and serial. This professional development course is designed for engineers and technicians who need practical skills and knowledge in understanding power system protection, including how to calculate fault currents, and select relays and associated instrument transformers appropriate to each typical system or. An EICR typically lasts 5 years for rental properties, 3-5 years for commercial buildings, and 10 years for homeowners. With a major renewal surge coming, qualified inspectors are booking up fast. If you're reading this, your EICR might already be. Landlords: legally required at least every 5 years (or at change of tenancy) and a copy must be provided to tenants. Owner-occupied homes: recommended every 10 years or when occupancy changes.
