

What is a cable tray slot box

Overview

Cable tray is a support system for cable installations. It is typically not covered on top (although it can be) and has a regular slot pattern on the flat, wide bottom and sides which allows for easy positioning of cables and fastening of cable ties. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require. What is a cable tray?

A cable tray is a structural system used to support and manage electrical cables in various settings, such as industrial, commercial, and residential environments. Some of its other features are as follows: Slotco Saves on time as it eliminates.
